

One *control tower* for every traveler, every claim, *every dollar*.

A single operational platform unifying emergency assistance, claims, providers, cost containment, and partner reporting — driven by AI and ready for SOC 2-grade environments.

PRODUCT IN 90 SECONDS

Sentinel Travel Ops is a *unified operations platform* for travel insurance and global assistance teams. Inbound from **7 channels** — voice, WhatsApp, SMS, email, app, portal, partner APIs — lands in a single workspace where AI classifies, scores, and routes it in under a second. Low-value claims auto-adjudicate; complex cases reach specialists with full context. *Cost containment* reads every hospital invoice line-by-line against regional benchmarks, preventing leakage before payment. *Predictive risk* forecasts surge volume during disruptions and recommends staffing moves. Partners and leadership see live program-level dashboards with **SOC 2**, ISO 27001, and GDPR controls baked in. *Every action* is audit-logged forever and replayable on demand.

The 14 surfaces

14 MODULES · 12 DEMO STOPS

01

/

Command Center

The home control tower — 312 active cases worldwide, urgent medical queue ranked by AI on severity and SLA risk, regional case-load gauges, and an AI co-pilot panel of next-best actions.

• demo moment · 8 urgent flagged · live SLA countdowns

02

/triage

AI Triage

Every inbound message is classified, language-pivoted, geo-located, urgency-scored, and routed in roughly 312 ms. The page animates the reasoning trail live for one case so prospects see the work.

• demo moment · Marisol's WhatsApp · animated reasoning

03

/claims

Claims Auto-Adjudication

A live rules-engine animation walks a baggage claim through six checks — policy, documents, duplicates, threshold, fraud, decision — ending in an auto-approved disbursement. Complex claims route to human specialists with full context.

• demo moment · Lina B. \$420 · auto-approved live

04

/cases

Medical Case Management

A single workspace per hospital admission with traveler identity, facility and attending physician, policy coverage, exposure, guarantee-of-payment status, full timeline, document checklist, and an AI-recommended next action.

• demo moment · CASE-8821 Mexico City admit

05

/cost-containment

Cost Containment

Every hospital invoice is OCR'd and compared line-by-line against regional benchmarks. Inflated charges, duplicates, and non-reimbursable items are flagged before payment and routed into a negotiation workflow.

• demo moment · INV-4471 saves \$7.4k

06

/risk

Predictive Risk & Surge

A live storm-radar scope plots travelers in the forecast cone, a 24-hour volume forecast projects inbound demand, and a surge protocol ranks staffing, partner, and traveler-comms actions to absorb the spike.

• demo moment · Tropical storm Esmeralda

07

/inbox

Omnichannel Inbox

WhatsApp, voice, SMS, email, portal, and app collapse into one timeline per traveler. Auto-translated, sentiment-aware, AI-summarized so agents pick up cold without losing context.

• demo moment · Marisol thread · 4 channels stitched

08

/providers

Provider Network

A scored network of 512 hospitals worldwide. When a case opens, AI proposes the top three providers within seconds — ranked by clinical fit, prior settlement variance, and billing speed — with one-tap outreach.

• demo moment · Top 3 ranked for Mexico City

09

/documents

Document Intelligence

Every page is OCR'd in source language, translated to English, classified, and auto-linked to the right case or claim. Confidence-scored extraction with missing-document and fraud-pattern alerts.

• demo moment · Spanish invoice extracted live

10

/traveler-portal

Traveler Portal

The customer-side preview — case dashboard with real-time status and one-tap-to-agent, plus a guided AI-driven new-claim flow with smart document checklists. 62% of inquiries deflected from voice.

• demo moment · Two phone mockups side by side

11

/partners

Partner Operations

One pane per insurer or partner program — their travelers, claims, cases, savings, SLA, and service-quality metrics in one exportable view. Switch between programs to see differentiated performance.

• demo moment · Allianz monthly dashboard

12

/executive

Executive BI

A weekly AI-generated narrative briefing reads the week in one paragraph, calls out top wins and items to watch, plus a 7-week performance trend chart and a ranked list of bottlenecks worth surfacing.

• demo moment · AI brief · export to board deck

13

/audit

Audit & Access

Every read, write, comm, and approval — from operator or AI service account — lands in an immutable WORM-archived audit log. Compliance posture for SOC 2 Type II, ISO 27001, GDPR, and HIPAA-aligned controls.

• demo moment · CASE-8821 audit replay

14

internal

Pilot Demo Setup

Internal presenter control room (hidden from prospects). Toggles scenarios, exposes seed-data volumes, lists the 14-minute demo script with clickable jumps, and gates a preflight checklist before going live.

• not shown to prospects · presenter only
